

IT Professional

Insight Enterprise offers a complete set of BI tools designed specifically for insurance companies that can help you avoid the time and cost of having to create, integrate, and customize BI solutions piece by piece.

Insight Enterprise can support all environments and the spectrum of requirements in even the largest organizations. Our complete end-to-end solution gives you the ability to demonstrate the solution to management and business users before the project is undertaken to clearly define scope and requirements.

We offer implementation services focused on ensuring that our software meets your business requirements, and that the project is implemented on time and on budget. Our team of professionals come prepared, not only with a deep understanding of our software, but also with years of experience in the insurance industry, bringing knowledge and best practices from a wide range of companies.

Finally, Insight Enterprise is built upon mainstream technologies that your company will likely already use; this minimizes staff training and infrastructure investment. More importantly, as the system is tried and tested, it can be delivered to your entire organization on time and on budget with end-user satisfaction.

Insight Decision Solutions was established by insurance professionals to provide integrated, enterprise-wide, analytical systems for insurance companies.

We focus solely on insurance to bring you analytical solutions to meet your needs.

Our staff consists of qualified professionals, with extensive experience in insurance and systems.

Insight Enterprise

Smart, confident decisions.

Insight Enterprise is a complete business intelligence system consisting of insurance analytics and applications, data storage, and data transformation and loading tools.

The system includes a number of unique features, including:

- Pre-built insurance specific applications, such as experience analysis, earnings by source and sales profitability.
- Open data model structured specifically for Life and Health insurance.
- Temporal data model enabling flexible analysis over time with fast response times for insurance applications.

The screenshots illustrate the software's capabilities in providing comprehensive insurance analytics. The top dashboard offers a high-level view of policy movements and inforce indicators. The middle dashboard provides a detailed look at earnings trends and sources. The bottom screenshot shows a granular view of financial values and risk metrics.

Contracts	Quarter	2007-Q1	2007-Q2	2007-Q3
Start		99,061	99,400	99,518
