

Medical

Insight Enterprise features a full range of applications specific to medical lines of business such as Medicare Supplement and Major Medical.

In particular, claim analytics such as loss ratios are available on a paid and incurred basis by a full set of claim and policy attributes, including diagnosis, examiner, location and product.

These features can increase speed and accuracy of regulatory filings and enable you to drill-down and build reports that give you insights into your business that were never possible before.

Insight Decision Solutions was established by insurance professionals to provide integrated, enterprise-wide, analytical systems for insurance companies.

We focus solely on insurance to bring you analytical solutions to meet your needs.

Our staff consists of qualified professionals, with extensive experience in insurance and systems.

Insight Enterprise

Smart, confident decisions.

Insight Enterprise is a complete business intelligence system consisting of insurance analytics and applications, data storage, and data transformation and loading tools.

The system includes a number of unique features, including:

- Pre-built insurance specific applications, such as experience analysis, earnings by source and sales profitability.
- Open data model structured specifically for Life and Health insurance.
- Temporal data model enabling flexible analysis over time with fast response times for insurance applications.

The screenshots illustrate the software's capabilities in providing comprehensive insurance analytics. The top dashboard offers a high-level view of policy movements and inforce indicators. The middle dashboard provides a detailed look at earnings trends and sources. The bottom screenshot shows a granular view of financial metrics and risk profiles.
